

I currently listed to an FM translator radio station. I am concerned about LPFM stations being given priority over this FM translator station (AIR 1). AIR 1 plays encouraging, uplifting music. It is safe for all ages as there is no profane language and no suggestive comments. This radio station meets the needs of many individuals and families by reporting on current events that many other stations do not cover. If this station were to be displaced by LPFM stations, the community would be losing an excellent source for news, uplifting music and safe talk shows. I think it is in the public's best interest to keep AIR 1 on the air.
